All, unconscious imitator of Petigra. The same thing was better said, net se very long src, in reference to precisely the same course, in—Charleston!

It was parfectly evident that the nomination was foreordsized. There was a strong undefcurrent against it is almost every county, but, to use the phrase of the Convention-packing trade, the delegations were "set." From the Western Reserve, particularly, there came carnest remonstrances. "Of course we'll support him if he's nominated; we always vots for the regular bandidate, but what do you want to put up a man you can'deet fur? And besides, what's the use of incurring unnecessary edium by nominating an unpopular man?" about 717 troops, and 800 negro volunteers some fifteen or sixteen hundred in all. On Saturday evening an alarm was brought to the Commander of the post that a large force of rebelt, some three thousand strong, were outside the works, at no great distance, marching upon the fortifications. The Fed-eral Commander immediately sent out his car-airy to detain the rebels, and the colored fall back.

It turned out that it was well that this pre-caution was taken, for after engaging the ene-my, and finding that we were about to be overpowered, our cavairy did fall back, and joined the colored infantry, when a battle took place, which waged on both sides with terrific fury. The rebels pressed, atili forward, and the white and black troons ouroused them

An unfortunate shot from the Choctaw

regro regiment. It was owing to the fact of
the steamer not being able to elevate her guns
sufficiently to fire above them to reach the
enemy, but this was remedied, and for a few
hours the fight continued, when the Choctaw

It was impossible for my informant to learn the extent of our loss, but it must have been considerable. About one hundred colored considerable. About one hundred colored men fell. The rebel loss was also considera-ble, and up to a late hour of Monday, when the steamer Niegara left for Memphis, they had not returned to renew the attack, and it is presumed should they do so that sufficient reinforcements of artillery have been forward-ed to the Bend to give them a sudden and ef-fectual outstress.

[CAIRO, June 12.—The steamer St. Cloud is up from Vicksburg. She left there on Monday morning. There was severe fight at Miltine's Bend on Saturday—one of the severest of the war, for the numbers engaged. The rebels, six thousand strong, under Henry McCullough, were formerly at Alexandria, La., but are more recenlly from Richmond, is.

They marched from the latter place in three columns—one on Toung's Point, another on Millicen's Bend, and the third on Lake Providence.

The force that reached Milliken's Bend wa The force that reached Milliken's Beni was about two thousand strong. Our force at that place was composed of a segro regiment, six hundred strong, with about two hundred white soldiers. When the rebais first made their eppearance, the white troops fell back and the negroes followed. It was soon ascertained that they ware surrounded, and must sight or surreader. The rebels proclaimed no quarter to the sagroes, and the negroes proclaimed no quarter to them.

A guntleman who saw part of the fight, and who was on the bettle-field after it was over, says the negroes fought like tigers—better, in fact, than their white officers, who, it is said, side not stay on the field. The Colonel, it is said skulked away in a diagraceful manner. I could not learn his name. This gentleman says we lost, in killed, negroes 90, white men 20. Our wounded number about 120. The list of killed is so large in consequence of many of the wounded being killed under the "no quarter" cry. Over 100 dand robels were left on the field, and they took away several wagen leads of wounded.

At about the time the battle was over at Milliken's Bend, the rebels made their appearance near Young's Point, and all the elliseus and translent, persons were put under arms. No sitack had been made when our informant left. The rebel force had not yet reached Lake Providence.

CRECKNAST, June 13, 1863.
Information has been received here that a raid was made upon the town of Poplar Plaine, Fishmaning county, Ky., on Thursday, by a gang of rebel guerillas. They arreaded all the male citizens in the pisce—Union and secesh—and put them under gnard. They then proceeded to the stores and dwelling-houses, and robbed them of everything valuable. A woman, who had a considerable sum of money, and who claimed the profession of the rebels, upon the ground that her husband was in the rebel army, was selzed by the socundrels and partially stripped of her clothing, and handled in a very rough way, to compel her to tell where she had hid her money. She refused, however, notwithstanding their threats to tear down her house, and they left, after stealing all the horses in the neighborhood.

command, moved to the left from the Junction, and encamped for the night in close proximity to Kelly's Ford, where Gen, Russell had already arrived. No fires were allowed, and a vigilant watch was kept to prevent disturbances or anything which might give any indication of our presence.

The orders were to asrones the commands at 3 a. m., and to make the passage of the river as soon as it was daylight.

At dawn Gen. Bufords command was in motion. Col. Davis' brigade, led by two aquadrons of the 8th. New York, and supported by the 8th Illinois and 3d indians, had the advance. The morning was cool and pleasunt, a thick mist hung over the river, and objects on the other side were rather indistinct. Our cavalry soon reached the river, dashed in, dashed up the bank, and were well on the opposities side before the rebels in their fortifications were aware of their presence.

A Captain, who was taken prisoner, said they were under orders to move on Wednesday morning at daylight. They moved a day sooner, and backward at that.

The prompt manner in which these plans of the enemy have been baffled will elicit the admiration of every one. A day longer and it would have been too late. Their plans are now known, and we can prepare accordingly. Fennsylvania and Maryland will awake to the importance of the occasion, and make all needful preparations to receive this horde of raiders. They will probably only defer, not abandon, their designs, and such a body of cavalry once loose in a defenceless State, they can take the whole of it. But Gen. Hooker has no masked them, and given time for preparation. Shortly he will be fully ready himself to take them thoroughly in hand.

After the Senate had voted to adhere, the bill was returned to the House. It had become evident before this, that the majority in the House did not intend to pass any bill for the riling of the sick and wounded solidiers, and that all their professions in its favor were more islicitable, intended to hide from the people their real intentions and purposes. The Senate then passed a joint resolution to adjourn on the Sth day of June, at 6 o'clock p. m. The House refused to concur, and amended the resolution and fixed upon the house to agree on a day of adjournment. The Senate then passed a joint resolution to a fixed upon the houses to agree on a day of adjournment, and thus ended the session.

It must be borne in mind that at the time of this disagreement the bill appropriating \$100.000 for the relief of sick and wounded soldiers, and through the constitution and fixed upon the houses to agree on a day of adjournment, and the contained the resolution and fixed upon the house are in arms against each other, and the contained the resolution and fixed upon the house to agree on a day of adjournment, and the contained the prompt, or it is of little value."

This was the first time in the history of the Bed General Assembly that they had manifested any anxiety or willingness to take up that bill, and they did not even do this usuff they well knew they so longer had any legels sistence as a legislative body, and that what they then did was of me force or effect wholeer.

The foregoing is a full and fair history of the arthon of the Democratis of the General Assembly on the subject of the appropriation for the benefit of our gallant soldiers. We appeal to the public to examine the record and see who is responsible for this neglect. We charge it upon the Democracy. Their faithlessness, bitterness, partisan feeling and distoyalty has done the deed. None can deny it. McClelian and Peace.

It was noticeable during the progress of the Copperhead Peace Convention in New York, that every alimeton to Vallandigham and McClelian was haired with vociferous choses. It is significant, also, that these cheers for this roldler, who always left the front at the opening of battle, (as sworm to by his Generals,) were given in connection with applace for an address which declared we had been beaten by the rebols. The inference is not a very favorable one for Fitz Napoleou, and we comment his friends to the enjoyment of it.

There is another revelation made by this pace meeting worth noticing, and that is, itself these men, who say we have been beaten for baving begun an unwarrantable and unchristian wer, are the very fellows who were always clumoring to have Little Mac at the lead of the Federal armies. Vallandigham, also, used continually to advocate him for supreme command. What is the inference from that?

that !

These Copperheads and trailors felt that the entrustment of the Federal armies to Fitz Napeleon was the surest way of having them completely guined. These same people now wish to make McClellan President. We leave

id himself open to imprisonmend, by carrying off a Ward in Cl SOMETHING FOR SOLDIER It has been shrewdly said by those well qualified to judge that "the Army of the Potomac was never properly educated," and that its ridical defect is want of proper company and regimental discipline. The men are brave willing and enduring: and they have corps commanders, and a Chief equal to all the emergencies of battle, but unfortunately the minor rivets in the great machine, have been improperly put in, and in the jur and strain of a zeries of concussions, it does not work as well as the more compact and orderly organization of the rebels. The following extracts from a letter written by a Union Colonel who was captured at the late battle of Chancellorsville, hears directly on this point of view. The letter appears originally in the Springfield (Mass.) Republican. After describing the incidents of his capture and exchange, the writer says: change, the writer says:

Doubtiess a great many reasons are given for our disastrous defeat at Chancellor-ville. There is only one real reason, and that the simplest possible. Our army didn't fight as well as that of our enemies. We had every possible advantage. We had the advantage of position, and no inconsiderable amount of well as that of our enemies. We had ever possible advantage. We had the advantag of position, and no inconsiderable amount of intrenchment. Gen. Hooker's plan was adm rably arranged and excellently carded our until the fighting took place. He expose himself in the hottest place of danger, an set an electrifying example of heroism to the whole army. The terrible loss of life amon our Generals shows that, on the whole, the were not found wanting at their posite duty. We had men enough, well enoug equipped, and well enough posted, to have tro.ns. They are as brave as the average of people-quitte as brave as our enemies are. But we don't fight in such a common-sense way as they do. Shall I tell you how one of our lines of battle engages? They go in fine style, steadily, in a good line and without any finething, half at what is held to be a desirable point, and at the command commence firing, standing, kneeling or lying down, as may be ordered. Then, as in all their previous training, they have been taught to load and fire ar rapidly as possible, three or four times a minute; they go into the business with all fury, every man tying with his neighbor as to the number of cartridges he can run into his piece and spit out of it. The amoke arises in a minute or two so you can see notthing where to and apit out of it. The smoke arises in a minmic or two so you can see nothing where to aim. The noise is desfeating and confusing to the last degree. The impression galus ground of a tremendous conflict going on. The trees in the vicinity suffer sorely, and the clouds a good deal. By and by the gams got heated and won't go off, and the cartridges begin to-give out. The men have become tired with their furious exertions, and the excitement and din of their own firing, and without know-ing anything about the effect produced upon-the carmy, very likely having searcely had one glimpes at the enemy at all, begin to thick they have fought about amongh and it is mar-WESTERN KNIFE CO 44 LAKE STREET, CHICAGO, syntheturers and Importers of all descriptions of are and hardware Sottons, some the introduction of the transition of the present of the transition of dollars and then y transition of dollars and then y the transition of dollars and then y they are the transition of the transi

SATURDAY, JUNE 18, 1953. THE CITY.

Ever since the determination expressed by the Union men of this city to contest the late municipal election upon the ground of frasda as palpable as the smulight, the Copperheads have manifested an outward show of indifference, and have assumed a degree of courage, and a self reliant innocence, which are shoultely refreshing in men who have no seruples at any amount of aviading, in order to attain their dishonest ends and peculiarly refreshing when viewed in the light of their corrupt practices at Springfield, so sudgestly strangied by the prompt action of the Executive. This braggest show of innocence and courage was not adopted for the purpose of moving the Union men from their determination, but to keep up the spritts of the rank and file of that party. It would not answer to let the men who had done the heavy voting know that there was a decided prospect of the present municipal sampres toing their places and the spoils attaching thereto for the coming two years, which were to be distributed as equitably as possible among those who had voted early and voted often.

But in the face of all this there was indisputable and internal evidence that the leaders were held at the recome of the Invincible Club, and at the Mayor's office to consult upon the matter, and these consultations were not of a remarkably cheerful character. The Those whistied every morning to keep up the courage of the party, but it soon became evident that whisting would not save them, as the Union men were hard at work in the wards canvassing the votes and ferretting out the frauds. So they employed conneal in the case, and soon from the recome of the Invincible Club isseed a confidential directur, addressed to leading Copperheads, imploring them to hunt up some Republican frauds and send them in to the young man Kinberley. We have already published that circular as a hint to our Union friends for rehewed vigilance. The returns to the circular as a hint to our Union friends for rehewed vigilance. without giving actice to the Union men, in defiance of the law we have quoted, and also in defiance of the law we have quoted, and also in defiance of the decision of the Court, in the recent argument inpon the application to file the information, which required that they should be asfely kept in the original packages, realed as the judges deposited them.

What was the object of these men in these sceret meetings? Clearly enough, to destroy evidence and to alter or destroy ballots enough of the Union vote to more than compensate for the Copperhead frauds and still leave Sherman, Mayor by a handsome vote. This is patent from the fact that that they openly bout they have found on error in the original count, and that Sherman has a majority nearly three their larger then the official count assigned. The production of this majority could be easily done. The time was midnight. No one was present but themselves. At that hour there was no danger of interference or interruption. Does may one imagine they would scraple to alter ballots? A large number of ballots were cast which the names of Union randidates pasted over the Copperhead ones. How easy to misten the slip and pull it off! Them again it was a very simple process to erace penell marks upon a scratched ticket, and it will be remembered flere was considerable cratching done at the late election. How easy to have men present from the various wards who were well sequalated in those words, and selecting from the poll books naknown names, remove the Union tickets bearing the corresponding names and numbers and atthict they valuly imagined they could cover up their valuly imagined they could cover up their

We have no doubt these advantages will be thoroughly improved. The public have long feit the need of just such a place of resort. It is near to the city, beautifully located, contains all the necessary plenie fixtures, even to the luselons berries growing upon the ground, with cream fresh from the dsiry. Next week the grounds will be fairly opened, and several parties are already projected for the first two or three weeks. The new grounds are destined to be universally popular.

THE CONSCRIPTION ACT. A WOMAN ARRESTED FOR RESIST

man's arrest. The examination, as we have stated, occurred at 9 o'clock yesterday morn-ing. Mr. Cowles, of Goodwin, Larned & Goodwin, Carred ing. Mr. Cowles, of Goodwin, Larned & Goodwin's office, appeared for the prosecution, and E. W. McComas for the defense.

The Commissioner, after hearing the tastimony, decided to hold Mrs. McCafferly to ball in 41,000, to answer any indictment that may hereafter be found against her in the United States Court. The utter folly of st-tempting to resist an official of the Government must be obvious to every one. The Provost Marshal is determined to carry out his instructions to the letter, and will do it regardless of consequences. How much better, then, for all persons to submit quietly, and patiently await the result. The enrollment will be carried on, despite all opposition, and a ready acquiescence and submission to the laws of the land will prove in the end much more satisfactory than any opposition

much more satisfactory than any opposit which can be inaugurated. THE GREAT LAKE TUNNEL.

PROJECT FEASIBLE.

As stated in yesterday's issue, the Board of Public Works, after considering the numerous plans suggested for obtaining a supply of pure water for the use of the city, are more severably impressed with that of a "Lake furner" than either of the other plans, and they have already organized a corps of men to investigate the character of the bottom of the Lake, to secretals if the project is peacticable. It is known from artesian borings on the Lake shore, at Lill's brewery, that shout twenty feet below the surface, a clay formation commences, which continues upwards of one hundred feet further. Wherever the investigation has been made, the bottom of the lake, where the water is more than twenty five feet deep, is clay. Should this clay prove to be continuous, and free from beds of sand or gravel, a tunnel can be easily constructed, of sufficient capacity to supply the city for several years, and still others constructed to increase the supply, if

Croes, 50 State street, having the exclusive agency of Winship's ventilators, it is not to be wondered at that venders of inferior kinds should insist that a current of air passing through a refrigerator melts the ice faster than one which is attright and sirvful. But the fact is, that by simply closing the valve, Winship's become air-tight, so that the objection can be remedied if deemed desirable; while no other refrigerator can be ventilated and purified at the will of its owner. For a further illustration of these facts, call at 50 State street, and examine them.

Dr. Maccowan's Lucreaus.—Various cir-cumstances have rendered it necessary for Dr. Maccowan to defer the completion of his course of popular lectures on Japan, until the ensuing season. Having an engagement with the St. Louis Mercantile Association, he the ensuing season. Having an engagement with the St. Louis Mercantile Association, he is desirous of visiting all the towns in the Northwest where lectures are patronized. From the reports which we have already given, it will be seen that they have our hearly endorsment, and we can commend them to lecture committees, and institutions throughout the country generally. Yesterday, Dr. M. visited 'Change, and gave a brief account of the prospective channels of oriental commerce, by which European actions are striving to bring the traffic of the East in the most direct manner to their shores. He also explained the nature of his purposed scientific and industrial surveys of the unknown portions of Eastern Asia, referring also to the Chinese sorghum, and their success in crystalizing it. Although the time allotted for the address was too brief for a proper explanation of the proposed enterof the national importance of the project, and gave it their hearty approval.

To THE UNION MEN OF CHICAGO.—The contest as to the late municipal election is going on before the Superior Court. Our opponents are straining every nerve to conceal the frauda by which they obtained an apparent majority at the polls. Doubties, most of the fraudalent votine was done by men who are fraudulent voting was done by men who are not very extensively known—by men who have but few acquaintances. Let every man in the city, who values the purity of the ballot-box, collect all the infornation he can as to the names of fraudulen

mation he can as to the names of fraudulent yoters—the wards where they voted—how many times they voted—the witnesses by whom the facts can be proved, or any other information as to doubtful or illegal votes, or other fraudulent practices at the election, and carry the information to the office of Joseph E. Gary, esq., 39 Clark street, who is one of the counsel in the cace, that the elective franchise may be preserved to us, in fact as well as in name.

THE MONEY MARKET.

The demand for money continues active, and the supply abundant. No man who has the right kind of "documents" need want for money. Indeed some of the banks complain of a want of the right kind of paper for discount. The range is 8,510 W cent, and large offschiga payable in New York would be taken by a few houses at T.

The market for exchange is heavy, owing more tea lack of currency than any large surplus of exchange. The buying pitce is par; the weakers may perhaps pay a small fraction above, but it is not usual. Selling rate 1,484, the upper figure for small drafts.

In the Baltic markets prices had gone up in an-icipation of a quarrel between Britain and the United States, but at Dantzic, Stetten, and other ports prices had fallen again, as the State of polit-cial matters became more fully known. The Black Sta trade did not appear to influence the market, and we note no quotations of arrivals or sales from that quarter. At Constantinople prices were well maintained, as the consumptive demand seemed to be more than usual.

Wheat from Nebraska.

Yesterday Mr. W. R. Stone, of this city, ceived on consignment 1,500 sacks choice wireless mostly in Nebraska, from Council B. Jowa. This is the first consignment of grain received from such a distant point, and we us stand that it is the first installment of 20,000 be destined for this market. The wheat was received from such a distant point, and we understand that it is the first installment of 30,600 bushels destined for this market. The wheat was shipped by Frederick & Jackson, Council Bluffs. The route of shipment was, from Council Bluffs to St. Joseph, by the Missouri river, and thence to Chicago by rathroad. The rate of freight is not made public, but it is low enough to permit of a fair margin to all concerned. Next year we look for a large amount of all kinds of produce from the territory west of the Missouri river.
